Highlights for the **Hobby Gardening market**

EconSeeds BV

Company Profile

Our company produces and supplies flower seeds to seed companies, distributors and growers worldwide. The focus is on high quality seeds of cut flowers, perennials plants, bedding plants, innovative (open-pollinated) annuals for direct seeding, as well as contract production of vegetables seeds. EconSeeds BV is an independant, family-owned company operational since July 2008.

In October 2016, EconSeeds BV acquired Graines Bertrand, an internationally renowned producer of quality flower seeds since 1947. This acquisition completes EconSeeds' installation of seed production facilities in the Loire Valley (France) working with production contracts of over 500 varieties of flowers and vegetables each year.

Welcome !

We are pleased to introduce you to our wide range of products suited for the hobby gardening market.

We produce a wide range of about 1500 varieties, whether long-time favorites or innovative, in the best quality to ensure the gardener's success.

A special focus has been given to the development of flower mixtures for all purposes, that give a new breath to a quickly evolving market.

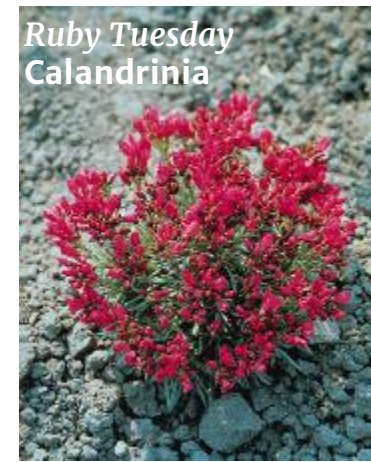

We are looking forward to hearing your interests !

Birds
Flowers to attract

Launched at the initiative of the Observatoire Français d'Apiculture (the French Apiculture Observatory (OFA)), this globally-spanning operation encourages individuals to sow nutritious flowers for bees each year in June to fight against the decline of colonies. A new flower meadow was produced by Graines Bertrand especially for this occasion. Since the beginning of the operation in 2017, hundreds of thousands of packets have already been sown!

Vegetable Seeds

Our global network of growers allows us to offer many options for the production of vegetable seeds, whether from traditional cultivation or organic.

This service is offered off-crop on a contract growing basis.

Do you wish to make an enquiry or ask for our surplus list ?

Please contact Hans! hveenstra@econseeds.com

Our facilities

France (Anjou)

In the Loire Valley or « Seed Valley », we grow and process well over 500 varieties of vegetable and flower seeds.

We have 3 farms for the production of elite stockseeds.

Our experienced team and continuous investment in equipment allows us to get the very best of each batch.

The Netherlands (West-Friesland)

Our head office, sales administration, quality lab, logistics, and storage facilities are located in Enkhuizen.

Seed is distributed worldwide from our controlled-atmosphere storage facilities.
